

CS 162 Rubric(/35)
Recursion

Name:

Please submit a working C++ program that captures and prints the capital letters of an input string. For example, "I lOVe PrOgraMMiNg in C++" would return "IOVPOMMN". The program should have a main method for testing. It should have a method called findCapsRec that does this recursively as well as findCapsNonRec that does this non-recursively.

5 points — use of good programming practices (ie. Indents, comments, etc.)

20 points – The program contains all working methods

- findCapsRec(10 pts)
- findCapsNonRec (10 pts)

10 points – Main method tests all parts appropriately
